Construction Play helps a child to,

- develop hand-eye coordination and movement skills
- understand how parts fit together
- improve memory through practice

It also gives a sense of achievement!

- Play posting games.
- Play with shape-sorters.
- Do jigsaws. The easiest kind are simple inset puzzles.
- Build towers, bridges and houses out of bricks.
- Use chairs and sheets to make dens.
- Play with stacking rings and stacking cups.
- Put things in and out of containers and bags.
- Hide toys under cloths or boxes or bury objects in sand.
